

I am writting on behave of KLOVE. I am a local listener who enjoys being able to find KLOVE on my local radio no matter where I travel. I would like to have a more local focus (so that I could hear traffic reports and local weather) but I flip to other stations for that. I like not hearing about local violence and I love singing along to the positive songs that come across the airwaves. There are other local stations that play the same type of music but I choose to listen to the national broadcast because I get to hear about other parts of the country and all that is happening all over the world. Don't lessen the movement that KLOVE has started in this country by limiting their boardcast stations.
